

**SOLACO**  
Auto grade heat  
insulation glass

Auto Grade Glass with Nano Materials -PVB

Heat  
insulation

Anti-UV

Better  
vision

Perfect Heat  
insulation & Anti-UV  
Performance

SOLACO Auto grade heat insulation  
glass, can **reduce 99% UV** from sun.

RAP

Excellent Heat  
Insulation  
Performance

SOLACO Auto grade heat insulation glass ,can reduce 85% infrared radiation heat from sun.

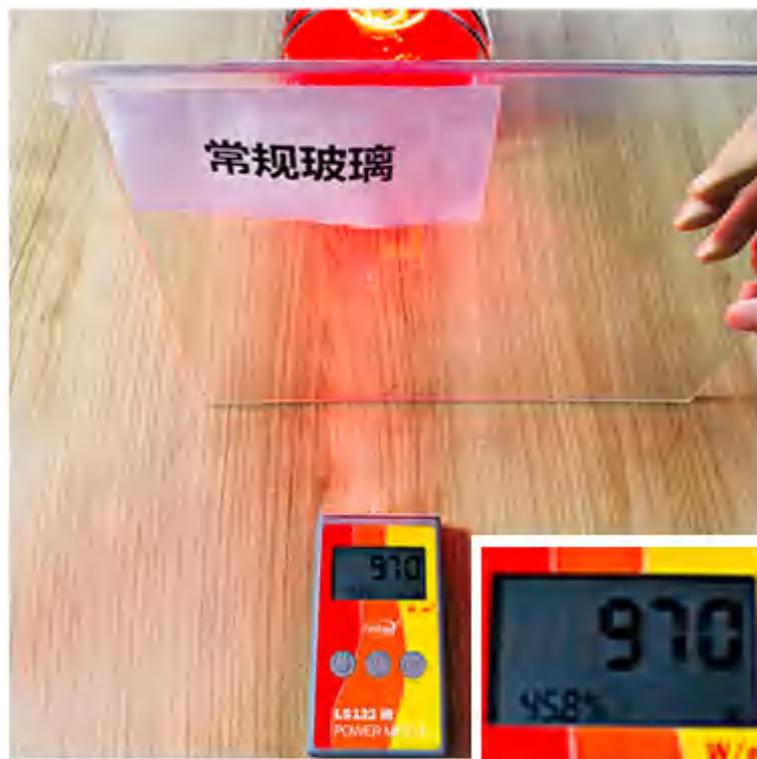

# SOLACO VS Normal Auto glass Infrared detection heat insulation data comparison.

measuring instrument on, the light intensity value is 12.

light source on, the light intensity value is 2116.

Under the same light source, normal auto glass, the light intensity value is 970, the infrared rejection rate is 54.2%.

Under the same light source, SOLACO Auto grade heat insulation glass, the light intensity value is 262, the infrared rejection rate is 87.8%..

# HD&Safer

SALACO Auto grade heat insulation glass offer rider better vision&safer driving.

**Stable Performance  
without Attenuation**

Using nano material PVB,  
the performance is stable  
and never fails.
